DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Papineni et al (US Patent No. 6,246,981) in view of Morin et al (US Patent No. 5,748,841)

3. Regarding claims 1-25, Papineni et al teach

Input to the dialog manager at col. 5, lines 22-24

Dialog manager is not preprogrammed with knowledge of applications at col. 6, line 64 – col. 7, line 5

Determining a response to the input based on the current context at col. 6, lines 14-28

Executing tasks associated with an application at col. 6, lines 27-28

Maintaining dialog history, detecting the context of the use input and determining the intention of the user at col. 5, lines 21-27

Multimodal input at col. 6, lines 3-9

Multimodal device for input is a computer at col. 6, lines 3-9

Dialog manager provides responses that best matches the input at col. 6, lines 27-28

Dialog manager queries the user for information at col. 5, lines 48-50

Papineni do not teach that the determining the current context of the command by reviewing a history of events. However, refer to Morin et al who teach a multimodal dialogue

system and user interface which uses a history handler to determine a dialog context (col. 10, lines 1-41), for the purpose of assisting the user in acquiring the language of an application (col. 1, lines 10-15).

Therefore, it would have been obvious to one of ordinary skill at the time of invention to modify the dialog system of Papineni and use a history handler to determine a dialog context, as taught by Morin et al, for the purpose of assisting the user in acquiring the language of an application, as suggested by Morin et al.
